To the Administrator Addressed (TTAA) letter expected around 3/15/17:

- IDEA-B LEA MOE Calculation Tool being revised
  - Affects LEAs that failed the Per Capita Test(s) in 2014-2015 AND submitted exceptions/adjustment to TEA, but the amount was not enough to bring the LEA into compliance
  - The amount of exceptions/adjustment in intervening years for Per-Capita tests should be based on a per capita amount, not a total amount
  - The revised MOE Calculation Tool will take into account an “adjusted per-capita amount” for Intervening Years by adding a column for the child count from the last compliant year

- Exception 3 for particularly costly program for a particular student: New costly program threshold $9,290 (previously was $8,865)
- 2015-2016 Preliminary Compliance Review expected to be added to GFFC first week of April 2017
