SPP Troubleshooting Document

- [http://tea.texas.gov/Curriculum_and_Instructional_Programs/Special_Education/Data_and_Reports/Local_Educational_Agency_Reports_and_Requirements/](http://tea.texas.gov/Curriculum_and_Instructional_Programs/Special_Education/Data_and_Reports/Local_Educational_Agency_Reports_and_Requirements/)

Key Things to Remember:
- Internet Explorer only
- If Internet Explorer 10, last page has compatibility mode instructions

SPP 7, 13, and 14

For districts (especially happens to charters) that have no campuses in drop down or no campuses to submit, the district is NOT included in the indicator if they do not have students in AskTED who meet the criteria.

Examples:
- Charter is Elementary only (PK-3), will not show up for SPP 13/14
- If they do not have PK, will not have SPP 7
This is a huge change!

This has NOT impacted SPP 11 and 12 since they are not campus based indicators.

SPP 11 & 12 are reported as a combined total at the district level.

SPP 7 Updates

Enhancement

Currently the best guidance is found in the TEA “Instructions for Entering Data for State Performance Plan Indicator 7” document.
SPP 7 Updates

Enhancement

- Students will no longer “roll over”
- Campus administration will not be able to submit data until all children with exit data are complete
- If student turns six on/before Sept 1st an exit will be required

SPP 7 Updates

Data must be submitted in the SPP 7 application for all 3, 4, and 5-year-old children who meet scenarios described below:

- Exit data (COSF Summary Data) are not reported for children with Entry data, however an exit reason must be recorded for the following students who:
  - left prior to 6 months in the program
  - were in the program at least 6 months and moved out of the district before meeting one of the two criteria for Exit data collection (age out/no longer qualifies)
  - left for other reasons (i.e. death)
Now is the time to run reports:

- Who needs COSF or
- Reason why they do not have one
FAQ Document Question 10:
When a student transfers from a school district in another state and the new school district determines that an evaluation is necessary, is this considered a full & individual **INITIAL** evaluation?

Yes. This student would be counted in SPP 11.

FAQ Document Question 11:
A child is referred, evaluated, and turns 3 during the summer? The ARDC meeting is held prior to school starting (after they turned 3). How is this reported for Indicator 12?

The ARDC meeting **MUST** be held prior the child’s 3rd birthday, even if occurring in the summer. If held after, the district is out of compliance.
FAQ Document Question 12:
A child is referred by the parent a week after their 3rd birthday. Is this child included in SPP 11 or 12?

This child is counted in SPP 11.

FAQ Document Question 13:
A child was receiving ECI services, but the parent denies a referral to the school prior to age 3. After the 3rd birthday, the parent decided they wanted Part B services. Is this student reported in SPP 11 or SPP 12?

Since there was a break in ECI services as a result of the parent’s choice...prior to age 3, this child would not be included in SPP 12.

*If the child is evaluated this is reported in SPP 11.
Fluctuation in number of students reported in this indicator has been wild lately and they are trying to increase data quality and make sure sampling is representative of whole state, not of only certain campuses. Compliance level is high statewide but fluctuating numbers statewide are of concern, thus the changes.

Changes will only affect the largest districts that were previously in cyclical assignment of campuses. This will no longer be in effect. Now all districts will have all campuses that meet the requirements for data collection (starting with grade 8, based on data in AskTED).

Sampling for those with 6 or more campuses instead of being cyclical will have different sampling procedure to engage in.

Can see inactive campuses at any time. If campus has no child to report data on due to sampling procedures, they will need to change those to no student data (campuses can be submitted together, “in bulk” at one time as no students to submit data).

All campuses must be in status (not inactive) before the district certifier can submit.

There is a cap of 250 students total that can be submitted. If they have trouble or need to submit more students,

Any problems/concerns, contact Tammy Pearcy or Susie May. They are willing to work with districts that will be burdened unnecessarily based on the changes in data.
