

The Educational Resources Cooperative includes access for participating ESC-20 private schools to a variety of online resources and services that support digital literacies and school libraries in all content areas.

Districts that sign up for the Educational Resources Co-op for private schools receive:

1

access to Britannica School digital resources and two (2) professional development sessions targeting integration

2

access to the Living Science Materials Center

3

attendance at the regional Library Resource Roundup at a reduced cost to members

4

selected professional development workshops at no or reduced cost to members

5

weekly van delivery services to all districts participating in the co-op

Living Science Materials include over 100 living specimens and selected TEKS aligned science materials kits. Small mammals (hamsters, rats, mice, and gerbils), insects, non-venomous snakes, fish, live frogs, plants, flower and vegetable seeds, micro-organisms, preserved specimens, prepared petri dishes, and de-ionized water are some examples of available materials. Full product list at <http://esc20.net/livingscience>.

Digital resources available to Ed Resources Co-op private school members:

Britannica Online School Edition: up-to-date, and age-appropriate information resources for elementary, middle, and high school and Britannica Spanish Reference Center: Enciclopedia Moderna for high school and Britannica Escolar Online for ages 6-12.

Two targeted Britannica School professional development sessions:

- Britannica 101
- Make the most of your Britannica School access
